

YOU CAN DO IT

WITHOUT ROUTINE FINGERSTICKS*

The FreeStyle Libre system is an accurate,¹ convenient, and easy² way to get glucose readings and trends.

Two components:

innovative sensor technology

- No fingerstick calibration required
- Small, discreet,² and water resistant†
- Can be worn for up to 10 days
- Sensor automatically measures glucose readings day and night‡

compact, lightweight reader

- Painless,² one-second scan—even through clothing§
- Stores up to 90 days of glucose data
- Backlit touchscreen for visibility

Healthcare professionals: for more information on the FreeStyle Libre system, visit Provider.FreeStyleLibre.us

How to get started with the FreeStyle Libre system

1 get a prescription

Request a written prescription. Your healthcare professional can use our example as a guide.

2 go to pharmacy

Fill your prescription at a participating pharmacy. Your pharmacy may have to order the product for you.

CVS Pharmacy | Kroger | Rite Aid Pharmacy | Walgreens | Walmart

FREESTYLE LIBRE INDICATIONS AND IMPORTANT SAFETY INFORMATION

The FreeStyle Libre Flash Glucose Monitoring system is a continuous glucose monitoring (CGM) device indicated for replacing blood glucose testing and detecting trends and tracking patterns aiding in the detection of episodes of hyperglycemia and hypoglycemia, facilitating both acute and long-term therapy adjustments in persons (age 18 and older) with diabetes. The system is intended for single patient use and requires a prescription.

CONTRAINDICATIONS: Remove the sensor before MRI, CT scan, X-ray, or diathermy treatment.

WARNINGS/LIMITATIONS: Do not ignore symptoms that may be due to low or high blood glucose, hypoglycemic unawareness, or dehydration. Check sensor glucose readings with a blood glucose meter when Check Blood Glucose symbol appears, when symptoms do not match system readings, or when readings are suspected to be inaccurate. The FreeStyle Libre system does not have alarms unless the sensor is scanned, and the system contains small parts that may be dangerous if swallowed. The FreeStyle Libre system is not approved for pregnant women, persons on dialysis, or critically-ill population. Sensor placement is not approved for sites other than the back of the arm and standard precautions for transmission of blood borne pathogens should be taken. The built-in blood glucose meter is not for use on dehydrated, hypotensive, in shock, hyperglycemic-hyperosmolar state, with or without ketosis, neonates, critically-ill patients, or for diagnosis or screening of diabetes. Review all product information before use or contact Abbott Toll Free (855-632-8658) or visit www.freestylelibre.us for detailed indications for use and safety information.

The product images are for illustrative purposes only.

* Fingersticks are required for treatment decisions when you see Check Blood Glucose symbol, when symptoms do not match system readings, when you suspect readings may be inaccurate, or when you experience symptoms that may be due to high or low blood glucose.

† Sensor is water resistant in up to 1 meter (3 feet) of water. Do not immerse longer than 30 minutes.

‡ Based on the sensor being replaced once every 10 days, and scanned at least once every 8 hours.

§ The reader can capture data from the sensor when it is within 1 cm to 4 cm of the sensor.
